

JY/FT003P

Premature Infant Model, Dark

The premature is a replica of a premature baby at gestational age of 30 weeks with 1.5kg body weight (life-size premature infant manikin with realistic appearance and anatomical features).

It can be used for the following training programs:

Supports skin-to-skin nursing care.

Supports suction and nasogastric feeding via nose and mouth.

Supports practice premature baby breastfeeding skills, including proper positioning for breastfeeding and the management of common breastfeeding problems.

Supports practice breast milk expression.

*Palpation practice of the anterior fontanelle in premature infants, with wide cranial sutures, large fontanelle and soft fontanelle edges;

Supports practice of premature infants' cleaning and bathing in an incubator;

Comes with a cup, allowing practice cup feeding.

Material: vinyl

3 options of complexion are available:
Light, Dark, Neutral/Universal

Skin For Choose

Minimum order quantity for your choice of dark complexion is 20 units.
