

## JY/F-0018U.1 Breastfeeding Simulator, Light

This simulator is a Replica of adult female breasts, life-size and lifelike, with wearable design and realistic anatomical structures. It's a True-to-life anatomical representation ideal for practical training.

It's equipped with adjustable straps for length and tightness, ensuring a secure fit for trainees and suitable for breast self-examination training.

It supports simulation and practice of breastfeeding and milk expression.

**\*The simulator also supports the management of common breastfeeding problems, such as inverted nipple, swollen breasts, use of breast pump and painless lump, etc.**

Material: vinyl

3 options of complexion are available:
