

JY/H-3032+

Full Body Infant Venipuncture Manikin, Universal

The manikin is a replica of a full-term, life-size neonatal baby with realistic anatomical structures.

It comes with soft, flexible and lifelike skin, which makes underlying venous structures visible. And semi-translucent skin design, easy to facilitate vein identification and location.

It can support the following functions:

1. Anatomy and Airway

1) Realistic head, neck, and upper airway anatomical structures, including oral, nose, tongue, gums, pharynx, larynx, esophagus, epiglottis, trachea;

2) Open the airway by head tilting and chin lifting;

3) Supports oral and nasal suction, endotracheal intubation and oxygen inhalation.

2. Vascular Access and Injection

1) Comes with simulated veins, which can be used to practice injection, blood withdrawing, fluid (blood) infusion/transfusion.

The following veins are presented in accurate anatomical positions:

Jugular vein, Basilic vein, Cephalic vein and Saphenous vein.

2) Comes with the umbilical cord stump, which can demonstrate umbilical catheterization and infusion site for training.

Material: vinyl

3 options of complexion are available:

Light, Dark, Neutral/Universal

Skin For Choose

Minimum order quantity for your choice of dark complexion is 20 units.
