

## JY/J-004

# Airway Management Simulator, Universal

The simulator presents a male adult head and torso with accurate anatomical structures, including the mouth, tongue, teeth, nostrils, oral pharynx, nasal pharynx, larynx, trachea, esophagus, lungs, and stomach. It supports airway opening via head tilting or chin lifting and precisely depicts the anatomical characteristics of the cricoid cartilage, thereby facilitating clear demonstration of the Sellick maneuver and airway spasm.

This airway management simulator can be used for practicing the following:

1. Tracheal intubation via the oral route
2. Nasal feeding and gastric lavage via the nasal and oral routes
3. Oral, oropharyngeal, and nasopharyngeal suction; bronchial suction via the oral or nasal route using a bronchoscope
4. Observation of bilateral lung expansion during positive pressure ventilation
5. Practice in the use of airway adjuncts, including Guedel airways
6. Practice of the Sellick maneuver

**\*Additional functions include: simulation of laryngospasm and edema; practice of thyrocricoentesis and tracheotomy care; practice in clearing airway obstruction and suctioning liquid foreign bodies; observation of lung breathing movements during artificial respiration and practice in breath sound auscultation; manual squeezing of the bulb to simulate carotid pulse.**

Material: vinyl

3 options of complexion are available:  
Light, Dark, Neutral/Universal

Skin For Choose

Minimum order quantity for your choice of dark complexion is 20 units.

Packing List	
Item Specification	Quantity
Adult trachea cannula	1
Nasal feeding tube	1
Nasal suction tube	1
Liquid lubricant	1
Simulated cricothyroid membrane	1
Spare neck skin for replacement	1
Adult BVM for resuscitation	1
Carrying case	1
Instruction manual (in English, French and Spanish)	1
Warranty card	1
