

JY/F-0001U/1

Prevention & Management of Postpartum Haemorrhage Simulator, Universal

The simulator represents an adult female lower torso with accurate anatomical structures of the postpartum cervix and uterus life-size, showing the pelvic cavity and spine. It suitable for use in severe postpartum haemorrhage training scenarios and can be used for the following training programs:

1. Simulate three kinds of bleeding conditions: uterine, cervica and vaginal

bleeding. Simulated blood can be injected into the postpartum uterus via the syringe 50ml, and repeated injection operation needs to be done until the pipe system is filled with the simulated blood.

2. Supports fundus massage and bimanual uterine compression

3. Remove the retained placenta manually.

4. Supports demonstration of intrauterine balloon tamponade.

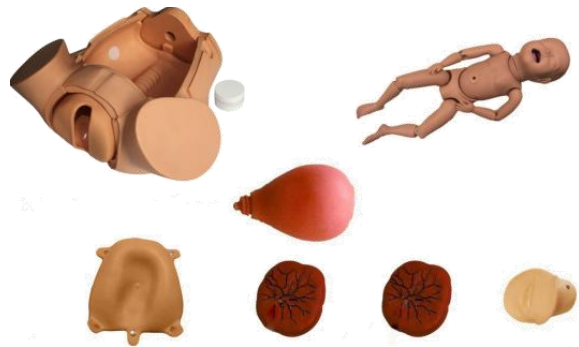

5. Supports demonstration of packing uterus with gauze.

6. Supports practice how to place urethra catheter into the simulated bladder.

7. Simulation of estimating the blood loss.

***Supports training in vaginal tears suture**

Simulation of childbirth: Equipped with a flexible joint baby, attached with an umbilical cord and placenta, which can support demonstration and training of the whole labor procedures.

Material: vinyl

3 options of complexion are available:
Light, Dark, Neutral/Universal

Skin For Choose

Minimum order quantity for your choice of dark complexion is 20 units.
