

JY/F-0029W Female Contraception Simulator (wearable), Light

The model shows accurate anatomical structures of female internal and external reproductive organs, such as vulva, vagina, urethra, rectum, perineum, vagina, cervix, uterus fallopian tubes and ovaries.

It comes with a transparent cover, which makes the users easy to view and learn how to insert and remove the IUD correctly;

Shows the uterus between pregnancies and immediately post-abortion

Indicates three positions of uterus: anteversion, horizontal and retroversion;

Practice vaginal examination with a speculum; available bi-manual pelvic examination, use of the uterine sound, insertion and removal of IUD, insertion of the female condom and fitting a diaphragm.

Can be placed on the desktop or be worn by means of the belts.

Material: soft, flexible vinyl

3 options of colors are available: Caucasian, Asian and African.
