

JY/F-0002H

Advanced Childbirth Skill Training Simulator, Dark

This simulator supports the simulation and practice of the following procedures and scenarios, and enables users to practice and master normal delivery obstetric skills (single-birth natural vaginal delivery, Left Occiput Anterior).

The abdominal skin comes with one simulated incision area, which can be used to practice Cesarean section delivery.

It supports training in intrauterine assessment and manipulation of the fetus, various breech presentations for training, including complete breech, frank breech and footling breech, fetal head assessment, including fontanelles palpation, simulation of umbilical cord prolapse, vacuum-assisted delivery procedures

It comes with 2 placentas, which simulates two kinds of placenta conditions: partial and total placenta previa.

It comes with the detachable umbilical cord and placenta, the cord can be cut and clamped repeatedly, and the placenta anatomically accurate and demonstrates the major structures of the placenta in realistic coloring; Supports practice in umbilical cord and placenta delivery.

It comes with a cushion and a fetus for practice in Leopold's maneuvers.

It comes with three vulva skins to simulate episiotomy procedures

***Comes with a transparent abdominal skin, which is helpful for teaching demonstration of various delivery scenarios;**

Comes with two full-term babies, one boy and one girl, enable demonstration and practice of twin delivery.

Comes with a belt, which can fasten the simulator properly.
