

JY/H-400+

Full Functional Neonatal Nursing Manikin(with CPR monitor), Universal

The manikin is a replica of a full-term neonatal baby with realistic anatomical structure . Its hair is molded, and the skin is soft and elastic, which is ideal for repeated training. Its head, neck and jaw are fully articulated, with a realistic tongue included.

It can support the following functions:

1. Airway Management

1) Realistic oral anatomical structures, including oral, nose, tongue, gums, pharynx, larynx, esophagus, epiglottis, trachea;
2) Supports oral and nasal suction, endotracheal intubation and oxygen inhalation;

3) Open the airway by head tilting and chin lifting;

4) Realistic chest rise can be seen during positive pressure ventilation.

2.CPR Training: comes with an electronic monitor, supports various ventilation methods such as mouth-to-mouth/nose ventilation and bag-valve-mask ventilation, and the tidal volume and compression depth are electronically monitored. Ventilation and chest compression can be trained separately.

The neonatal manikin is durable enough to withstand thousands of chest compression cycles under proper use condition.

3.Vascular Access and Injection

Practice intravenous injection and transfusion via the arm and the femoral vein;

1)Supports umbilical catheterization and infusion training;

2)Supports heel-prick blood sampling training.

4.Observation and Assessment

Comparative study of normal and dilated bilateral pupils

*Additional training functions

1. Supports basic nursing operation: bathing, change/wear diaper, cold and heat therapy, washing face, and oral cavity nursing, etc.

2. Supports tibia puncture training.

Material: vinyl

3 options of complexion are available:
Light, Dark, Neutral/Universal

Skin For Choose

Minimum order quantity for your choice of dark complexion is 20 units.

Packing List	
Item Specification	Quantity
Electronic CPR monitor	1
CPR External Power Adapter(Input: AC100-240V 50/60Hz ; Output: DC 9V)	1
Disposable mouth-to-mouth face mask (50 pcs/box)	1
Rubber tube clamps	4
Umbilical cord clamps	1
Diaper	1
Tibia bones for replacement	2
Simulated wax	1
bone marrow puncture needle	1
Set of transfusion bag and stand	1
Simulated blood powder	1
Liquid lubricant	1
Syringe(50ml)	1
Syringe(5ml)	1
Soft portable bag	1
Instruction manual (in English, French and Spanish)	1
Warranty card	1
