

JY/F-0002P

Advanced Childbirth Education Training Simulator,Light

Anatomically accurate showing half female torso with hemi pelvis including pelvic cavity and spine, etc. The belly cover works as adult abdominal skin and it's palpable.

Comes with one soft full-term baby boy manikin, whose fontanelles is palpable, attached to an umbilical cord and placenta.

Practice and master normal delivery of umbilical cord and placenta and early cord management, and the umbilical cord can be cut and clamped.

With soft and smooth skin texture and realistic sculpture, all kinds of childbirth scenarios can be vividly reproduced, e.g. management of normal and breech deliveries can be simulated.

Rotation, fetus delivery speed, even the delivery procedure can be controlled manually. The uterus firmness can also be adjusted from atonic to fully contracted.

Material:vinyl,hard or flexible as anatomically appropriate

3 options of colors are available: Caucasian, Asian and African.
